Mendon School Building Sells For

Williams stated that the unusual feature of the new window is the curvature of the glass so that the sun's rays are reflected in this out to reduce the glare and reflection in the classroom. Williams further stated that the building was planned to be a permanent structure and that the cost of the building was not to be a burden on the town.

The building will be available for use at the beginning of the Fall term of 1938. The members of the School Board, Vice President, David B. Esmerde, Mr. Wille and Charles Fent, and an expressed satisfaction with the design of the building, stating that the cost of the new building will be in the neighborhood of \$9.12 per square foot.

Original estimates made when the building construction was approximately 15 percent completed, were \$9.00 per square foot. It was estimated during the construction that the cost of the building would be approximately 15 percent more than the original estimate.

Mr. Esmerde also stated that the Mendon-Union Local High School is the second construction in the town under construction in the 1930's. The first building under construction in the town was the Union County High School near Union County, which was completed in 1930. The Mendon-Union Local High School was completed in 1931. The Mendon-Union Local High School was the first building under construction in the town since the Union County High School was completed in 1930.

Russell Hesse, President of Mendon Union Local School Board, today announced that the contracts were awarded for the General Contract, and Plumbing and Heating Contract, on the last Friday night, October 14. The General High School awarded to the Butterfield Construction Company of Lima, Ohio, on their low bid of \$3,422. Plumbing and Heating Contract was awarded to the Company of Lima, Ohio, on their low bid of \$3,422.

The Plumbing Contracting Company was awarded the contract on their low bid of \$35,949.

Included in the contract was \$117.5 million for construction of a new sewage tank; and in the plumbing contract an amount of \$408,000 for a sewage treatment system.

The building was designed to accommodate the purpose move from the old building to the new building. The new building is a modern structure with a kitchen equipped with a refrigerator, a stove, and a sink. It also has a dining room and a living room. The building is located in the center of the city and is easily accessible by public transportation. The building is a good example of modern architecture and is a valuable asset to the community.

In discussing the new building, Williams stated that teaching facilities of the Madison Local School will be doubled, since the building when finished will have the equivalent of twelve classrooms, whereas the existing building contains only 12 rooms suitable for academic work. The building will be used to house High School, and Junior School students. Commencement is scheduled so that the new building

will be available for use at the beginning of the Fall term of 1951. The numbers of the Board, in addition to these are: Sinter, Lee Martin Kofsky, Eisner, and all other members with the board. The building will be in the city of \$9.12 per sq ft. The original cost was \$10.00 per sq ft.

Adorath also stated that the Mendon Union Local High School is the second Maximille School to go under construction in Ohio. The first building under construction is the Rohn Twp. Elementary School, near Churchville, Ohio, in Tuscarawas County.

Adorath also stated that bids will be opened December 20th on a new Maximille School for the Findlay City School District Board of Education, starting in excess of \$40,000 square feet.

The local firm also has a Maximille combination Elementary and High School Building, with large Gym. and Shop Building, under construction in Rosedale, Indiana. The Franklin Local Elementary Addition was also designed by them.
